The state of the technology

Trend in some sectors and countries

Trends in District Heating

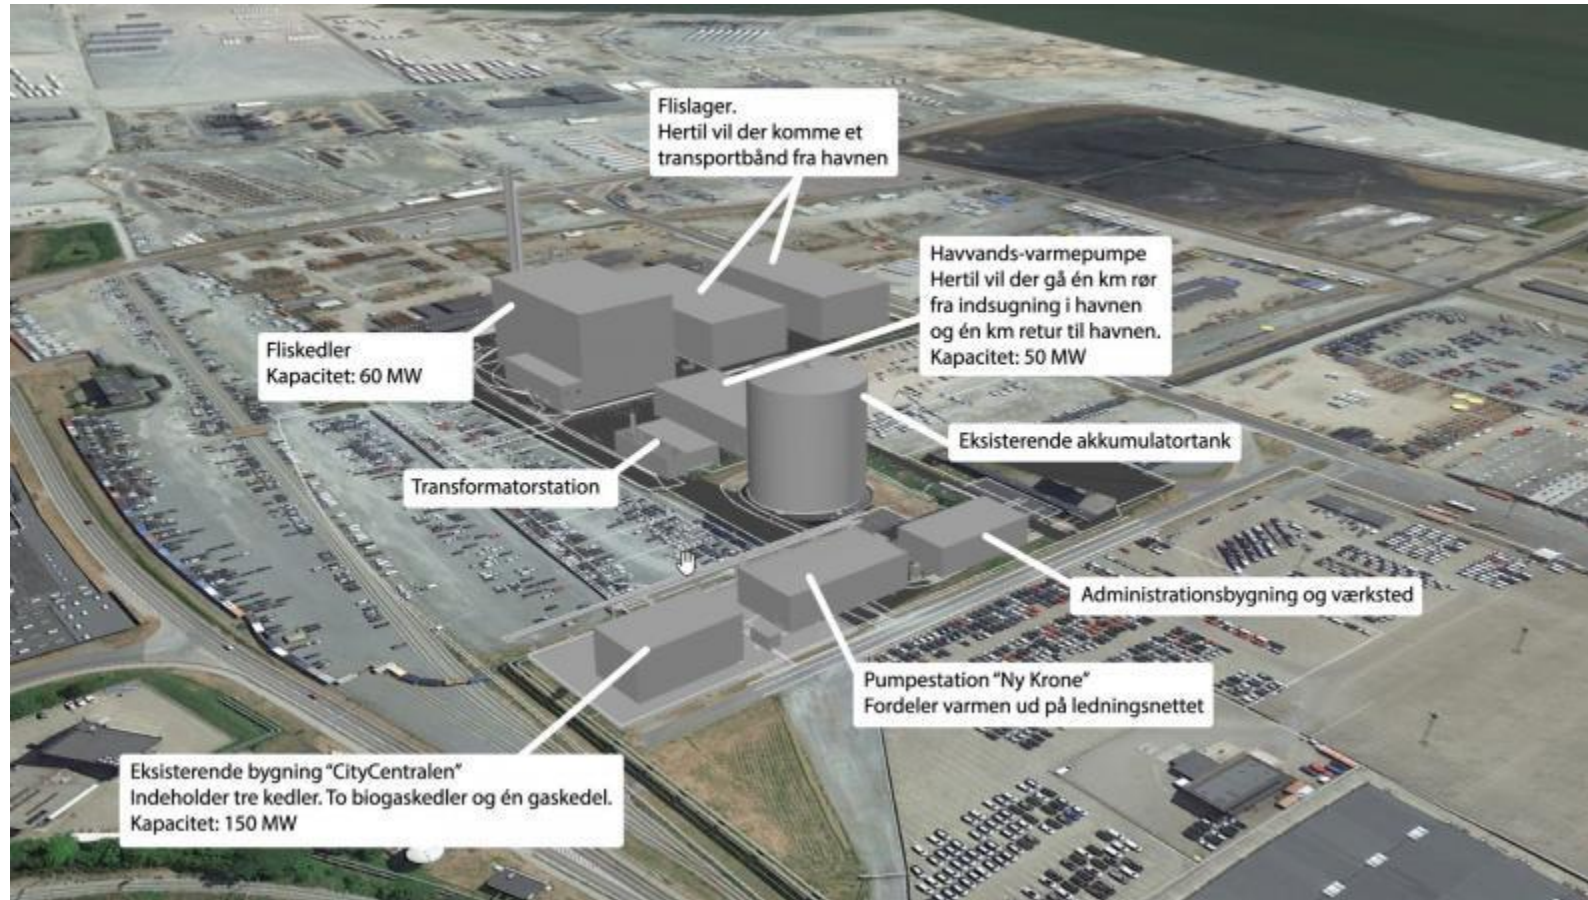

State of the technology

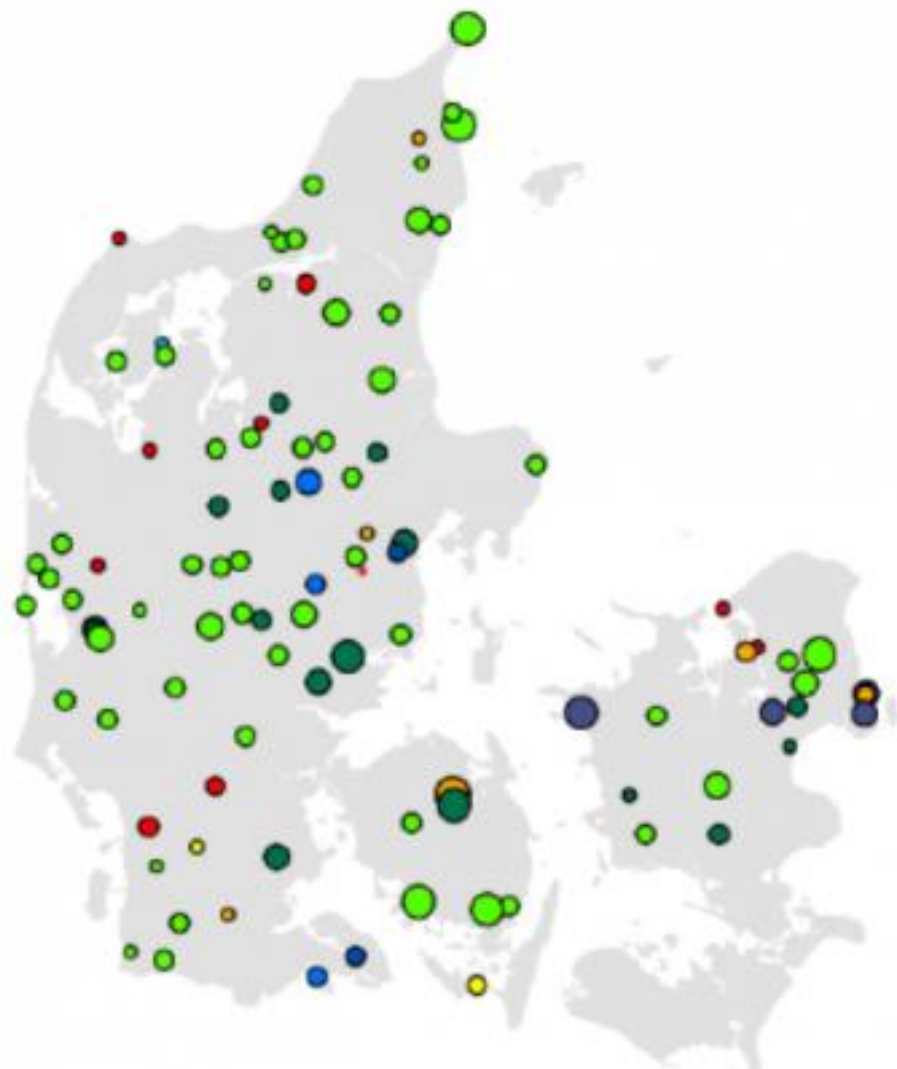

- Wide use of CO₂ – still growing especially in retail but also in small industry
- Wide use of NH₃ – continues especially in heat pumps and heavy industry
- Wider use of HC – still in head winds but gaining acceptance

Trends in some sectors and countries

Trends in District Heating

Varmekilde

- Andet/ukendt
- Drikkevand
- Grundvand
- Havvand
- Luft
- Overskudsvarme
- Røggas
- Solvarme
- Spildevand
