

## Application Form for NDC4 Call for Proposals

The global project “Cool Contributions fighting Climate Change II” ([C4 II](#)) assists countries in implementing Nationally Determined Contribution (NDC) mitigation measures in the Refrigeration and Air Conditioning (RAC) sector. Simultaneously, C4 II aims to support countries in developing more differentiated and ambitious NDC cooling targets and actions.

The project launches a Call for Proposals which provides technical advisory to ambitious countries in the application of best practices for NDC strategy development in the RAC sector. Up to three additional countries can be supported.

### Application procedure and required documents

Interested entities are invited to submit proposals containing as a minimum the following two documents in PDF format:

- Completed application form as PDF format  
Please note that applicants may request the application form in word version by sending an email to [ndc4@giz.de](mailto:ndc4@giz.de).
- Letter of intent from applying entity and from additional consortium members (if relevant) signed and as PDF format

Optional documentation (proposals submitting these annexes will be assigned extra points):

- Letter of intent to include the HFC emission into the national greenhouse gas (GHG) inventory
- Letter of intent of department responsible for the NDC, stating that it strongly supports the activities proposed and aims to include an ambitious sectoral target for the RAC sector in the next NDC update as well as measures to achieve this target.

Please submit the required documents (PDF format) to: [\*\*ndc4@giz.de\*\*](mailto:ndc4@giz.de)

Application deadline: **16 January 2023**

In case of any questions, please contact [ndc4@giz.de](mailto:ndc4@giz.de). Please note that a [webinar](#) on the application process will take place on **22 November 2023, 2-3 pm CET**.

### Current national targets concerning the RAC sector

Kigali Amendment ratified (yes/no, if yes, state the date of ratification)	
RAC sector and/or HFC emission target(s) target(s) mentioned in the current NDC	
Plans on RAC sector targets for upcoming NDC update (if any, please state reference)	
Current minimum energy performance standards (MEPS) targeting the RAC sector	
Other relevant energy efficiency and HFC regulations	

Supported by:

based on a decision of the German Bundestag

## Activities of all consortium members relevant for this application

**Please list and briefly explain previous activities in the RAC sector** of the applying entity and each consortium member that are relevant for this application. Please mention explicitly the involvement in cooling plans or NDCs in general (max. 100 words for each consortium member)

## Type of activity requested

**Please tick the type of activity for which you request support in this application**

- Support for status quo analysis of RAC sector (information on emissions, policies, stakeholder cooperation)
- Support for the application of the RAC sector tier 2 inventory methodology
- Support for the establishment of a National Cooling Action Plan (prioritizing mitigation measures in the RAC sector)
- Support for the establishment of a Monitoring, Reporting, Verification (MRV) system for RAC sector emissions and mitigation measures
- Support for the definition of NDC measures targeting the RAC sector in a transparent and trackable manner
- Support for implementation of concepts
  - Sector specific analysis and mitigation plan, e.g. tourism, commercial refrigeration, cold chain
  - Concept for technician training
  - Review of energy efficiency regulation based on market analysis
  - Customizing of tools for sectoral inventory, MRV, etc.
- Other, **please specify:**

Please provide context, description and aim of activities for which support is requested and how it they will support an ambitious NDC in the RAC sector (max. 500 words)

**Please detail estimated required support in terms of scope of technical assistance and estimated number of days (up to 30 days) (max. 200 words)**

**Please specify planned own contributions including relevant staff experience (max. 200 words)**

**Please specify commitment and the plan on how the results of the supported activities will feed into further activities** (e.g. policy making, RAC sector/GHG inventory process, NDC process). These could be summarised in the Letter of Intent. (max. 200 words)

**Please list affected stakeholders, government departments that are affected/need to be involved. Explain how they will be involved** (max. 200 words)

Supported by:

based on a decision of  
the German Bundestag

**The signing entity declares that all information provided is correct to the best of the entity's knowledge.**

**With the signature, the signing entity applies for technical assistance as outlined above as part of the C4 II project.**
